

# Savannahlander

Lose all sense of time and place as you enjoy one of the great rail experiences of the world, the Savannahlander. Affectionately known as The Silver Bullet, this classic 1960s rail motor sets off from the tropical coastal paradise of Cairns and journeys back in time through some of the most dramatic scenery changes possible to Forsyth, the remote heart of Queensland's Gulf country.

## Your onboard experience

The Savannahlander is not only a unique train journey, but a great way to see some truly one of a kind attractions like the unforgettable Undara Lava Tubes. All along the way you'll enjoy an informal atmosphere, where the driver acts more like a chauffeur. Requests to stop the train for a better photo or a closer look at the local flora and fauna are always met with a smile. It's an experience you won't find anywhere else.
