

Frederick Street bridge replacement

Project update July 2022

Queensland Rail is working to deliver a new active transport bridge in Alderley, between Frederick Street and Mina Parade.

In early-2020, the bridge was removed due to structural issues and to ensure the safety of the local community. Since then, work has been ongoing to design a new bridge for the community and the concept designs are now available for the public to view.

Queensland Rail staff will be on-site at Alderley station to present the new concept designs and answer any questions **between 7.30am and 9.30am on Tuesday 12 July.**

You can also view the designs online by scanning the QR code below to visit our project page.

Works are expected to commence later this year in preparation for the new bridge to be installed and operational by late-2023.

Thank you for your patience while we work to deliver this key piece of infrastructure.
