

SEQ Rail Stabling Program - Woombye construction update

CPB Contractors are continuing work to construct the Woombye stabling facility. The following construction activities will be undertaken throughout June 2016, weather permitting:

- Earthworks and ground preparation for the stabling facility, access road and car park
- Transporting materials using haulage trucks
- Installing drainage, water and sewerage services
- Installing concrete foundations for overhead line equipment (OHLE) and signals
- Standing OHLE and signal masts
- Installing the security fence for the stabling facility.

These activities will include the use of machinery such as excavators, mobile cranes, front-end loaders, generators, scrapers, dozer, grader, padfoot roller, smooth drum roller, vacuum excavation trucks, concrete truck, concrete pump and small power tools such as drills, track welders, saws and hammers.

You will notice the following around your local area and on-site during these works:

- Increased truck and vehicle movements along Old Palmwoods Road and Back Woombye Road from Monday to Saturday 6.30am to 5.00pm for deliveries of material and equipment to site
- Old Palmwoods Road, Back Woombye Road, Blackall Range Road and Reids Road will be the primary haulage routes during the project, however some light vehicles may use alternative routes dependent on the origin of the supplier
- Workers may arrive on-site between 5.30am and 6.30am to prepare for the day's activities.

If you have any construction related questions or would like to register for regular updates, please contact CPB Contractors on 1800 783 334 and press 1 or email stabling@qr.com.au

SEQ Rail Stabling Program - Woombye construction update

The Project Team will endeavor to minimise impacts to neighboring residents and businesses including noise and dust during the construction of the Woombye stabling facility. We appreciate your patience during the construction period and will continue to update you as work progresses.

Where can I find out more information?

For any queries related to the operation of the facility, please contact Queensland Rail on **1800 783 334** and press 2 (free call) or email **stabling@qr.com.au**. Visit **www.queenslandrail.com.au/stabling** anytime for more information and updates.

Project information

The South East Queensland (SEQ) Stabling Program involves the design and construction of new or additional train stabling facilities in four locations: Robina, Banyo, Elimbah and Woombye.

The \$116 million project was announced in May 2015. The SEQ Stabling Program is part of the broader New Generation Rollingstock project that will see 75 new suburban six-car trains added to the South East Queensland City network, a 30 per cent increase of the current fleet.

CPB Contractors will design and construct the new stabling facilities to help house 75 new six-car trains which are scheduled to commence services in the second half of 2016.
