

Dakabin station accessibility upgrade

PROJECT UPDATE – OCTOBER 2018

The Dakabin station accessibility upgrade is part of Queensland Rail's \$300 million program to upgrade stations across the network, making them accessible for all customers.

Concept designs for the Dakabin station accessibility upgrade are now complete. The upgrade will include:

- a pedestrian footbridge with lift access
- a multi-storey car park with disability and motorcycle spaces
- two new disability parking spaces and a kiss 'n' ride on Narangba Road
- a kiss 'n' ride and bus stop on each side of Thompson Road
- a new station building with a public unisex accessible toilet
- a raised section of platform at assisted boarding points
- new platform shelters
- upgraded tactile surface indicators and hearing augmentation loops
- a new 24-space bicycle enclosure on Thompson Road
- new wayfinding and platform signage
- upgraded security cameras and lighting.

Concept designs are available to view on Queensland Rail's website and at the station.

We will continue to refine the designs for the Dakabin station accessibility upgrade. As we move through the design and construction phases, we will keep local residents, customers and community groups well informed of the project's progress.
