

SEQ Rail Stabling Program

Woombye – night work

CPB Contractors will be undertaking rail rectification works between **midnight Sunday 15 January and 3am Monday 16 January 2017**, within the railway corridor adjacent to Woombye station. These works will occur outside the project's normal working hours.

Location	Dates and hours of work	Type of work
Railway corridor south of Woombye station	Midnight Sunday 15 January – 3am Monday 16 January 2017	<ul style="list-style-type: none">• Drilling of two holes into the rail turnout at the stabling facility

These activities require CPB Contractors to work within the rail corridor, which has the potential to impact on the safe operation of scheduled passenger and freight rail services, and must therefore be completed outside of the project's normal working hours.

Queensland Rail and CPB Contractors recognise the disruption these works may have on local residents living close to the railway corridor. We will endeavour to minimise the impacts of the work as much as possible, including using small and quiet equipment such as:

- Small generator
- Portable rail drill
- Hand tools
- Small portable lighting tower.

Further information

If you have any questions, or would like to register for more information, please contact the Project Team on 1800 783 334 (free call) or stabling@qr.com.au. **During out of hours activities CPB Contractors can be reached on 1800 783 334 (press 1).** Visit www.queenslandrail.com.au/stabling for more information and updates.
