

Nambour station accessibility upgrade

Project update – December 2016

Upgrade work continues on the platforms and in the subway at Nambour station in the lead up to the end-of-year construction break. Queensland Rail wishes you a safe and happy Christmas period and thanks you for your patience during these works.

Project progress

The following construction activities were recently completed:

- work on the southern end of the island platform in anticipation of re-opening in the New Year
- relocation of temporary toilets
- lift shaft excavation
- Energex work in the western car park
- cement rendering on the station building.

Upcoming work

In the coming weeks, customers and the community can expect to see the following construction activities:

- resurfacing of the pavement outside the station office (16-23 December)
- temporarily changed access to the station office from the platform side
- delivery of the new lift
- works on the subway stairs.

The lift will be installed early in the New Year.

Platform changes

In January 2017, the island platform will be reopened for customers, and the temporary platform will be closed.

At the same time, the northern end of platform 1 will be temporarily closed. Trains will stop in two stages on the southern end of the platform so that customers in all carriages can board and disembark.

Platform announcements and signage will be used to assist customers during this time.

Christmas update

Construction works at Nambour station will cease from 24 December 2016 to 8 January 2017. The courtesy bus will continue to run over this period.

Construction impacts

Customers, residents and businesses adjacent to Nambour station may experience the following:

- noise associated with heavy machinery
- use of reversing beepers
- changed traffic and parking conditions
- increased vehicle movements around the work zones, especially in the laneway behind Currie Street, accessed from Price Street.

Residents and other stakeholders will be given advance notification of construction activities likely to cause impacts, including after-hours work (nights and Sundays, as required).

Queensland Rail thanks you for your patience during these important works.

Keeping you informed
