Woombye – Bridge Strike Protection Works notice

Protection beam installation and temporary night road closure

Back Woombye Road, Woombye is scheduled to be temporarily closed between 9pm and 5am on both Tuesday 19 April and Wednesday 20 April, weather and construction conditions permitting.

If works are delayed due to weather, works will be rescheduled to the following day(s) and signage will be in place to advise of any changes.

The road closure is required to safely install protection beams on both approaches to the rail bridge over Back Woombye Road. This work is being done at night when traffic volumes are lowest and it will require a traffic detour.

Traffic management and signage will be in place to direct road users and pedestrians around the temporary road closure. Please refer to the map overleaf.

Residents will notice increased construction activity, lighting, truck and crane movements in the area during this time.

Queensland Rail will endeavour to minimise disruption to motorists and surrounding neighbours during works.

The bridge clearance will remain at 2.9 metres high following installation of the protection beams.

Queensland Rail is working in close collaboration with Sunshine Coast Regional Council and new warning and permanent detour signage will be installed to advise over-height vehicles of the clearance conditions.

It is essential motorists are aware of the height of their vehicles and follow signage.

This installation is part of a state-wide Bridge Strike Protection program to prevent over-height vehicles striking existing rail bridges, improving transport safety.
