

# Tree removal, Cannon Hill depot

## Week commencing Monday 17 August 2020

To enable the safe construction of the station's new footbridge and lift shaft, Queensland Rail will remove four trees from the Cannon Hill depot.

The trees will be removed during the week commencing **Monday 17 August**, and are located adjacent to platform 2 of the Cannon Hill station and the current timber footbridge.

 Trees to be removed

These works are necessary to provide access to construct and install the new station footbridge and lift shaft.

A qualified fauna spotter/catcher will supervise these works to ensure the protection and safe removal of animals prior to clearing activities.

Thank you for your cooperation while we build you a better Cannon Hill station.
