Works notice:
Allwood Street, Indooroopilly

Temporary road closure and night works

Allwood Street will be temporarily closed between Coonan Street and Clarence Road from 7pm Wednesday 28 to 5am Thursday 29 October 2015, weather and conditions permitting.

The road closure is required to safely install protection beams on both sides of the rail bridge over Allwood Street, Indooroopilly. This work will be done at night when traffic volumes are lowest.

Residents may notice increased construction activity, lighting and truck movements in the area during this time.

The bridge clearance will remain at 2.8 metres high following installation of the protection beams.

Queensland Rail will endeavour to minimise disruption to motorists and surrounding neighbours during works.

Traffic management controls and temporary electronic warning signage will be in place to redirect road users. Local access to properties within the road closure will be maintained.

Queensland Rail is working in close collaboration with Brisbane City Council and new warning and permanent detour signage will be installed to advise over-height vehicles of the clearance conditions.

It is essential motorists are aware of the height of their vehicles and follow signage.

This installation is part of a state-wide Bridge Strike Protection program to prevent ‘over-height’ vehicles striking existing rail bridges, improving transport safety.
