

Alderley station accessibility upgrade

Project update – January 2017

The Alderley station accessibility upgrade is part of Queensland Rail's \$212 million upgrade program and is expected to be completed by late 2017, weather and construction conditions permitting.

Project progress

Main construction works are underway at Alderley station:

The following works were recently completed:

- excavation and foundation works for the new footbridge stairs and heritage shelter on platform 1
- installation of temporary customer access paths around the station.

Upcoming work

In the coming weeks, customers and the community can expect to see the following construction activities:

- commencement of platform raising works for platforms 1 and 2
- installation of temporary ticketing office to enable refurbishment works to commence on existing station building.

Construction impacts

Customers, residents and businesses adjacent to Alderley station may experience the following:

- noise associated with heavy machinery
- changed traffic and parking conditions
- mobile lighting towers for night works
- increased vehicle movements near works
- temporary changes to access paths throughout the station precinct.

Pedestrians are advised to follow all directional signage during this time.

Residents and other stakeholders will be given advance notification of construction activities likely to cause impacts, including after hours work (nights and Sundays, as required).

Keeping you informed
