

Dinmore station accessibility upgrade

Project update – January 2017

The Dinmore station accessibility upgrade is part of Queensland Rail's \$212 million station upgrade program and is expected to be completed in mid-2017, weather and construction conditions permitting.

Project progress

The following construction activities were recently completed:

- completion of stage 4 platform raising works
- removal of the old timber footbridge
- opening of new stairs and footbridge
- installation of additional shelter on platform 2
- installation of roofing and guttering.

The removal of the timber footbridge (pictured at right and below) took place during a planned track closure over the weekend of 14-15 January.

Upcoming work

In the coming weeks, customers and the community can expect to see the following

- further platform raising works (stage 5)
- lift installation and commissioning works
- car park upgrade works.

Construction impacts

Customers and residents adjacent to Dinmore station may experience:

- noise associated with heavy machinery
- use of reversing beepers
- mobile lighting towers for night works
- changed traffic and parking conditions
- increased vehicle movements around the work zone.

Pedestrians are asked to follow all directional signage during this time.

Residents and other stakeholders will be given advance notification of construction activities likely to cause impacts, including after hours work (nights and Sundays, if required).

Keeping you informed
