

# Graceville station accessibility upgrade

Project completion –  
September 2017

The Graceville station accessibility upgrade is now complete, delivering improved access for all customers including those with disabilities, the elderly, parents with prams, people with injuries or those carrying luggage.

A community family fun day and BBQ was held at the station on Saturday 16 September to mark the opening. Queensland Rail thanks customers and the local community for their patience during works.

## Upgrade features

The upgraded station features:

- four new lifts providing access from street level and between all platforms
- raised platform sections for improved assisted boarding points
- extended platform waiting shelters
- shelters over subway access ramps
- refurbished ticket office and waiting room
- new accessible toilet and baby change facilities
- improved subway drainage
- upgraded CCTV and station lighting
- new wayfinding and platform signage.

## Remaining activities

Reinstatement of the site compound property on Appel Street (between Verney Road East and Connors Street), is underway.

In the coming weeks, customers and the community may notice an occasional presence around the station for minor follow-up works.

## Subway mural update

The current Graceville station subway mural was installed in 2009 as part of Queensland Rail's Positive pARTnerships program. Due to extensive construction works in the subway, we now have the opportunity to renew the mural.

Community feedback was sought on two options: Repair damaged sections of the existing mural or replace with a new design.

We will share the results once we have reviewed feedback. We thank the community for taking the time to provide input online or at the community information sessions.

## Keeping you informed
