

# Graceville station accessibility upgrade

## Project update – June 2017

The Graceville station accessibility upgrade is part of Queensland Rail's \$212 million station upgrade program and is expected to be completed in late-2017, weather and construction conditions permitting.

### Project progress

The following construction activities were recently undertaken at Graceville:

- installation of awnings over Appel Street and Honour Avenue pedestrian ramps
- painting of platform waiting shelters
- installation of new ticket window module in station building.

### Upcoming work

In the coming weeks, customers and the community can expect to see the following construction activities:

- platform-raising works on platform 2
- footpath and kerb upgrade works on Appel Street and Honour Avenue
- lift installation works
- ongoing awning works over ramps.

Residents and other stakeholders will be given advance notification of construction activities likely to cause impacts, including after-hours work (nights and Sundays, as required).

### Construction impacts

Customers, residents and businesses adjacent to Graceville station may experience:

- noise associated with heavy machinery
- use of reversing beepers
- mobile lighting towers for night works
- changed traffic and parking conditions
- increased vehicle movements near works
- temporary changes to access paths throughout the station precinct.

Pedestrians and motorists are advised to follow all directional signage during this time.

Please take care around the work zones.

### Keeping you informed
