

Graceville station accessibility upgrade

Project update – May 2017

The Graceville station accessibility upgrade is part of Queensland Rail's \$212 million station upgrade program and is expected to be completed in late-2017, weather and construction conditions permitting.

Project progress

The following construction activities were recently undertaken at Graceville:

- platform-raising on platform 2
- lift shaft installation works
- station office upgrade.

Upcoming work

In the coming weeks, customers and the community can expect to see the following construction activities:

- continue staged platform-raising on platform 2
- awning installation
- subway and ramps upgrade works.

Residents and other stakeholders will be given advance notification of construction activities likely to cause impacts, including after hours work (nights and Sundays, as required).

Construction impacts

Customers, residents and businesses adjacent to Graceville station may experience:

- noise associated with heavy machinery
- use of reversing beepers
- mobile lighting towers for night works
- changed traffic and parking conditions
- increased vehicle movements near works
- temporary changes to access paths throughout the station precinct.

To maintain station and cross-corridor access for customers and pedestrians, a courtesy shuttle (maxi taxi) will operate whenever subway access is restricted during May and June.

Please take care around the work zones.

Keeping you informed
