

Coomera to Helensvale Duplication

Establishment of laydown areas and material deliveries – Helensvale

March 2017

From early March 2017, Queensland Rail will start establishing 'laydown' areas at numerous locations along the rail corridor in Helensvale, to store machinery and materials required for construction of track and rail systems.

Delivery of materials to these laydown areas, including rail sleepers and ballast, is expected to continue until June 2017.

Materials will be stored and collected until the completion of rail systems and track works in late 2017, weather permitting.

Overview of work

Location	Dates and hours of work	Type of work
Rail corridor behind Careel Close, Helensvale, near the council pump station	Early March to October 2017 7am-6pm Monday to Saturday	<ul style="list-style-type: none">Establishing temporary laydown areas for construction materialsIncreased construction vehicle movements along haulage routesUnloading construction materials (sleepers and ballast) from trucksStorage, collection and movement of materials within the laydown areaAccess to rail corridor by project workers and vehicles.
Rail corridor at Country Club Drive, Helensvale	Late March to October 2017 7am-6pm Monday to Saturday	
Rail corridor near the easement off Rosedale Place, Helensvale	Early April to October 2017 7am-6pm Monday to Saturday	
Rail corridor north and south of Warrego Way, Helensvale	Early April to October 2017 7am-6pm Monday to Saturday	
Rail corridor and council land north of Balranald Court and Mildura Drive, Helensvale	Early April to October 2017 7am-6pm Monday to Saturday	

Residents and businesses near the rail corridor may experience increased heavy vehicle movements, as well as noise and dust associated with the establishment of laydown areas and the delivery of sleepers and ballast.

Where required, traffic control will be in place to ensure the safety of motorists, pedestrians and workers.

Queensland Rail apologises for any inconvenience and thanks the local community for their cooperation during these important works.
