

# Nambour station accessibility upgrade

## Project update – March 2017

The Nambour station accessibility upgrade is nearing completion with the lift and subway expected to be finished and in use during March.

### Project progress

The following construction activities were recently completed:

- all work on the island platform
- new accessible station toilets and baby change facilities (not yet in use)
- concourse footpath (on Civic Way).

### Upcoming work

In the coming weeks, customers and the community can expect to see the following construction activities:

- western car park resurfacing (early March)
- truck movements in the laneway (off Price Street) between Currie Street and the rail corridor
- closure of the northern end of the platform to allow resurfacing work, with associated noise from grinding and removing concrete.

Upgrade works will continue on the northern end of platform 1. These platform works will be undertaken during daytime working hours, rather than after hours as previously advised. Station building roofing works are scheduled overnight (11pm to 6am the next morning) on Saturday 18 March.

Queensland Rail thanks you for your patience during these important works.

### Access changes

The upgraded island platform will reopen to customers from Sunday 5 March and all trains will use this platform. Long distance trains will stop in two stages to allow customers to disembark and board all carriages.

The temporary platform will also be closed, ready for its removal.

### Subway and lift opening

The pedestrian subway and lift are scheduled to open by Monday 13 March (see station signage for updates). The lift will carry pedestrians from the subway level to the concourse outside the station. This will provide customers and members of the community step-free access across the rail corridor, between the carpark and Civic Way.

When the subway is reopened for pedestrian use the courtesy shuttle bus service will stop running.

### Keeping you informed
