

Newmarket station accessibility upgrade

Project update – September 2017

The Newmarket station accessibility upgrade is nearing completion, with footbridge, subway and lift works continuing.

Project progress

The following construction activities were recently completed at Newmarket station:

- corridor fencing along Abuklea Street boundary
- installation of wayfinding signage
- new bench seating in waiting room.

Upcoming work

In the coming weeks, customers and the community will see the following activities:

- installation of fencing and handrails on Abuklea Street footbridge ramp
- pedestrian subway mural works (pictured)
- ongoing lift installation.

The subway remains closed to the public for the duration of works. All access to the temporary platforms will be from the Wilston Road level crossing end of the station.

Subway mural update

Due to major construction works in the subway, we are updating the mural with new artwork by Michael Montgomerie (pictured, below left), the artist who designed the original, while being respectful of the original subject matter.

Construction impacts

Customers, residents and businesses adjacent to the station precinct may experience the following:

- noise associated with heavy machinery
- use of reversing beepers
- changed traffic and parking conditions
- mobile lighting towers for night works
- increased vehicle movements around the work zones
- temporary changes to access paths throughout the station precinct.

Pedestrians are advised to follow all directional signage during this time.

Residents and other stakeholders will be given advance notification of construction activities likely to cause impacts, including after hours work (nights and Sundays, as required).

Keeping you informed
