

## Coomera to Helensvale Duplication Night works – electrification and power systems

July 2017

As part of the Coomera to Helensvale Duplication, Queensland Rail is installing overhead electrification lines and associated power systems between Coomera and Helensvale stations.

**Installation of overhead electrification lines is scheduled to occur on selected nights in July, weather and operational factors permitting.**

The work requires the use of heavy machinery including trucks, cranes and lifts to run overhead electrical wire between mast foundations and conduct overhead modifications. These works must be undertaken at night for safety reasons and in order to maintain train services during the day.

### Scheduled night works

Location	Dates and hours of work	Type of work
Rail corridor between Coomera River and Ridgevale Drive, Helensvale	<b>10pm to 5am</b> the next morning on: <ul style="list-style-type: none"><li><b>Sunday 16 to Thursday 20 July</b> (over 5 nights)</li></ul>	<ul style="list-style-type: none"><li>Installing overhead electrification lines for the new track</li><li>Use of construction machinery and vehicles including reversing beepers and flashing lights</li><li>Use of mobile lighting towers.</li></ul>

Residents located near the rail corridor in these areas may experience increased noise and may also be impacted by the use of lighting associated with this activity. Every effort will be made to carry out these works with minimal disruption.

Queensland Rail apologises for any inconvenience caused and appreciates the local community's cooperation during these important works.
