

# SEQ Rail Stabling Program

## Banyo stabling facility operations

From 1 February 2018

The new Banyo stabling facility has been commissioned and is now ready to stable trains.

From **Thursday 1 February** the Banyo stabling facility will become operational. This will involve the stabling facility lights being turned on and the regular movement of trains in and out of the facility along with cleaning and minor maintenance.

Due to the fleet increase required for the Commonwealth Games, the Banyo stabling facility will initially be used to stable existing Queensland Rail trains, with New Generation Rollingstock stabled at the facility in the future.

You may notice low level noise, including the sound of train horns, and traffic as vehicles enter and exit the facility.
