

Bundamba station accessibility upgrade

Vegetation removal - mid-April 2024

Queensland Rail is continuing to progress works at Bundamba station as part of the accessibility upgrade.

For safety reasons, we need to remove a eucalypt in the existing carpark area.

An independent arborist report has found excavation works required for the accessibility upgrade will impact the tree's root structure and health to a level that requires its removal.

Queensland Rail values safety and sustainability. We will work to identify suitable replanting options.

Every effort will be made to carry out these works with respect for our valued neighbours. We apologise for any inconvenience. Thank you for your patience while we build a better station.
