

Cannon Hill station accessibility upgrade

PROJECT UPDATE – AUGUST 2020

The Cannon Hill station accessibility upgrade is part of the State Government's \$357 million investment to upgrade stations across the South East Queensland network, making them accessible for all customers.

Project progress

The following works have recently been carried out at Cannon Hill station:

- completion of Queensland Rail's early works
- closure of the Barrack Road carpark entrance and a number of carparks, for site establishment
- removal of existing waiting shelters and installation of temporary shelters and lighting
- relocation of ticketing equipment on platform 1
- ongoing design of the station upgrade.

Upcoming works

Customers and the local community can expect to see the following activities taking place, in the coming weeks:

- relocation of platform furniture and electrical/telecommunication wiring at the station
- finalisation of site setup, including the connection of utilities
- tree removal in the Cannon Hill depot
- establish fencing for platform construction zones.

Tree removal - Cannon Hill depot

The station upgrade has been designed with consideration given to the impact on local trees.

To deliver the upgrade, four trees will need to be removed from the Cannon Hill depot, adjacent to platform 2 of the station and the existing footbridge.

These works are necessary to provide access to safely construct and install the new station footbridge and lift shaft. Removal of the trees will take place during the week of Monday 17 August.

Tree removal will be carried out under an approved Environment Management Plan and a fauna spotter/catcher will be engaged prior to any clearing activities.

Construction impacts

During the station upgrade, construction activities may include:

- changed parking and traffic conditions for safety
- noise associated with heavy machinery
- temporary changes to access paths throughout the station precinct and surrounding areas
- increased vehicle movements near works
- the use of mobile lighting towers (for night works).

Normal working hours are 6.30am to 6.30pm, Monday to Saturday.

The local community will be given advance notice of construction activities likely to cause impacts, including after hours work (nights, Sundays and public holidays).

We thank you for your patience and cooperation as we build you a better Cannon Hill station.
