

# Cannon Hill station accessibility upgrade

PROJECT UPDATE – OCTOBER 2020

The Cannon Hill station accessibility upgrade is part of the State Government's investment to upgrade stations across the South East Queensland network, making them accessible for all customers.

## Project progress

The following works have recently been carried out at Cannon Hill station:

- asphaltting on platforms, following foundation works
- excavation in the northern carpark and back of platform 2 construction zones
- clearing works for future footbridge and lift shafts
- foundation works (screw piling) in the northern carpark and back of both platforms
- ongoing design of the station upgrade.

## Upcoming works

Customers and the local community can expect to see the following activities over the coming weeks:

- finalising the barrier, fence, access track and work platform between platform 1 and the freight line
- surveying station platforms
- footbridge and lift foundation works behind platform 2 and in the northern carpark
- partial platform raising works during the scheduled track closure - 21 to 22 November 2020
- detailed excavation of the new footbridge, lift, roof and stair footings
- installation of remaining screw piles on both station platforms.

### Partial platform raising works

This work involves raising a section of the platform at the assisted boarding points, which are located in the middle of each platform.

Raising the platform height significantly narrows the gap between the platforms and trains.

This allows for a safer, easier, faster and better boarding experience for all train customers, including seniors, parents with prams, people with luggage and customers who use mobility aids.

## Construction impacts

During the station upgrade, changes due to construction activities may include:

- changed parking and traffic conditions for safety
- noise associated with heavy machinery
- temporary changes to access paths throughout the station precinct and surrounding areas
- increased vehicle movements near works
- the use of mobile lighting towers (for night works).

Normal working hours are 6.30am to 6.30pm, Monday to Saturday.

The local community will be given advance notice of construction activities likely to cause impacts, including after hours work (nights, Sundays and public holidays).

We thank you for your patience and cooperation as we build you a better Cannon Hill station.
