

Cannon Hill station accessibility upgrade

PROJECT UPDATE – SEPTEMBER 2020

The Cannon Hill station accessibility upgrade is part of the State Government's \$357 million investment to upgrade stations across the South East Queensland network, making them accessible for all customers.

Project progress

The following works have recently been carried out at Cannon Hill station:

- relocation of platform furniture and wiring
- completion of site setup
- removal of trees in the Cannon Hill depot
- platform construction zone fencing installed
- footbridge changes and an additional construction zone installed in the northern carpark
- screw piling on both station platforms
- ongoing design of the station upgrade.

Upcoming works

Customers and the local community can expect to see the following activities over the coming weeks:

- asphaltting on both platforms, following recent screw piling work
- excavation in the northern carpark and platform 2 construction zones
- soil testing and electrical rewiring in the Cannon Hill depot precinct
- clearing works between the Cannon Hill depot and the back of platform 2, to enable future footbridge and lift shaft work
- installation of a barrier and fence, and construction of an access track and work platform between platform 1 and the freight line.

Construction impacts

During the station upgrade, construction activities may include:

- changed parking and traffic conditions for safety
- noise associated with heavy machinery
- temporary changes to access paths throughout the station precinct and surrounding areas
- increased vehicle movements near works
- the use of mobile lighting towers (for night works).

Normal working hours are 6.30am to 6.30pm, Monday to Saturday.

The local community will be given advance notice of construction activities likely to cause impacts, including after hours work (nights, Sundays and public holidays).

We thank you for your patience and cooperation as we build you a better Cannon Hill station.
