

SEQ Rail Stabling Program – Elimbah construction notice

As part of the SEQ Rail Stabling Program, CPB Contractors will be undertaking vital construction activities between the existing rail corridor and Beerburrum Road during the scheduled track closure of the North Coast line on 27 and 28 August 2016.

Between midnight and 4am Tuesday 23 August 2016, a track machine will be used to align the existing track to the turnout rail of the stabling facility. The track machine is used as part of Queensland Rail's normal maintenance program. It picks up section of track, compacts the ballast underneath and replaces the track into position.

Works undertaken as part of the scheduled track closure will occur continuously from **4am Saturday 27 August until 10pm Sunday 28 August 2016**, weather permitting. Works will include:

- Installing signals, lighting and CCTV poles
- Installing electrical conduits underneath the railway line
- Installing razor wire to the security fence
- Delivery trucks and workers' vehicles entering the site and unloading materials via Sanna Court and Hamilton Road
- Use of machinery, such as excavators, mobile cranes, front-end loaders, generators, track mountable excavators and small power tools, such as drills, saws and minor vibrating equipment
- Mobile lighting towers to light the work areas.

Queensland Rail and CPB Contractors will endeavor to minimise impacts to neighboring residents and businesses, including noise and dust, during construction of the Elimbah stabling facility. We appreciate your patience during the construction period and will continue to update you as work progresses.

Who can I contact?

If you have any questions or would like to register for more information, please contact the Project Team on 1800 783 334 (free call) or stabling@qr.com.au.

During out of hours activities CPB Contractors can be reached on 1800 783 331 (press 1). Visit www.queenslandrail.com.au/stabling anytime for more information and updates.
