

Morningside station accessibility upgrade

PROJECT UPDATE – FEBRUARY 2024

The Morningside station accessibility upgrade is part of the State Government's ongoing investment to upgrade stations to make them accessible for everyone.

About the project

Morningside station is being upgraded to make it more accessible, and easier for customers and the community to travel on our network.

The new, modern station will help people in wheelchairs, parents with prams and those travelling with luggage or who are injured, use the station with ease.

Project status

On Monday 22 January, Morningside station closed to allow major station upgrade works to commence.

The following works have been carried out recently at Morningside station:

- site establishment works finalised in the carpark
- installation of safety bollards and flagging on platforms in preparation for construction activities
- work compound established and security fencing installed within the precinct and on the footbridge
- construction of a temporary bus stop on Richmond Road for shuttle bus services (see image across)
- commencement of shuttle bus service 237.

Upcoming works

Customers and the local community can expect to see the following activities commencing in February:

- removal of footbridge ramps to allow for construction of the new station footbridge (see image below)

- restoration of existing retaining walls along Waminda Street
- carpark works to accommodate accessible parking bays and motorcycle parking within the park 'n' ride
- construction of the new pedestrian entrance and link to Waminda Street and shared pedestrian and vehicle zones within the park 'n' ride.

Works will generally take place between **6am and 6pm Monday to Friday**, unless notified. Every effort will be made to carry out these works with respect for our neighbours and customers.

Impacts

During the station upgrade, you can expect:

- the footbridge to remain open at most times, with stair access only to cross between Wynnum Road and Waminda Street
- increased personnel, vehicle and truck movements within the station precinct
- construction noise and machinery.
