

Morningside station accessibility upgrade

Quarterly project update | April 2024

The Morningside station accessibility upgrade is part of the State Government's ongoing investment to upgrade stations to make them accessible for everyone.

Project benefits

Morningside station is being upgraded to make it more accessible, and easier for customers and the community to travel on our network. The new, modern station will help people in wheelchairs, parents with prams and those travelling with luggage or who are injured use the station with ease.

Construction progress

Since the closure of Morningside station on Monday 22 January 2024, major work has been progressing on site including:

- site establishment including temporary pedestrian route
- decommissioning of station building and services
- ✓ demolition of old platforms
- ✓ excavation of platform extensions
- excavation and early works for the new Wynnum Road entrance
- demolition and removal of old concrete footbridge ramps and footings
- ✓ piling works for new platforms, footbridges and lifts
- \checkmark removal of station building awning.

queenslandrail.com.au

You can expect to see the following upcoming activities on site:

- construction of new raised platforms
- construction of new Waminda Street entrance plaza
- installation of new footbridge and lift shafts
- construction of new Wynnum Road pedestrian access
- carpark changes for new Waminda Street pedestrian access
- refurbishment of Waminda Street carpark retaining walls.

Works will generally take place between 6am and 6pm Monday to Saturday, unless notified. Every effort will be made to carry out these works with respect for our neighbours and customers.

📄 Alternative transport

Shuttle bus 237 continues to operate between Morningside and Cannon Hill stations to keep customers moving during the station upgrade.

We appreciate the community's understanding while we work to build you a better station.
