

SEQ Rail Stabling Program – Nudgee station night works

As part of development of the Banyo stabling facility, Queensland Rail and CPB Contractors are continuing to undertake construction activities between Bindha and Nudgee stations.

On Monday 26 September and Tuesday 27 September 2016 between 8pm and 4am, the following works will be undertaken at Nudgee station during the scheduled track closure of the Shorncliffe line.

Activities include:

- Installation of an overhead line equipment mast
- Installation of signal foundation
- Installation of signal cable lines underneath the Nudgee station platform.

You will notice the following around your local area during these works:

- Delivery trucks and workers' vehicles entering the site via Railway Street, St Achs Street and Elliott Road
- Vehicle routes will include St Vincents Road, Railway Street, St Achs Street, Elliott Road and Oakmere Street
- Delivery and unloading of materials and use of machinery such as excavators, mobile cranes, front-end loaders, generators and track mountable excavators
- Use of small power tools such as drills, saws and minor vibrating equipment
- Mobile lighting towers to light the work areas
- Changed traffic conditions, including reduced speed limits and short traffic delays, may be experienced. Traffic controllers will be on site when required to assist with changes to pedestrian and vehicle movements.

Queensland Rail and CPB Contractors recognise the disruption these works may have on local residents and will endeavour to minimise the impacts and duration of the work as much as possible. We appreciate your patience during the construction period and will continue to update you as work progresses.

Further information

If you have any questions, or would like to register for more information, please contact the Project Team on 1800 783 334 (free call) or stabling@qr.com.au.
