

Pomona station platform upgrade

Queensland Rail is upgrading and modernising the platform at Pomona station to improve facilities for customers. This is part of a \$4 million project to upgrade platforms at three Sunshine Coast line stations, replacing them with more durable platforms.

The upgrade to Pomona station will include a number of additional features such as soft landscaping, a heritage seat and plaque, new entry signage and a disability parking bay. Works will commence in late 2018 and will be completed in the first half of 2019.
