

# Tree removal, Thompson Road precinct

## Commencing late June 2020

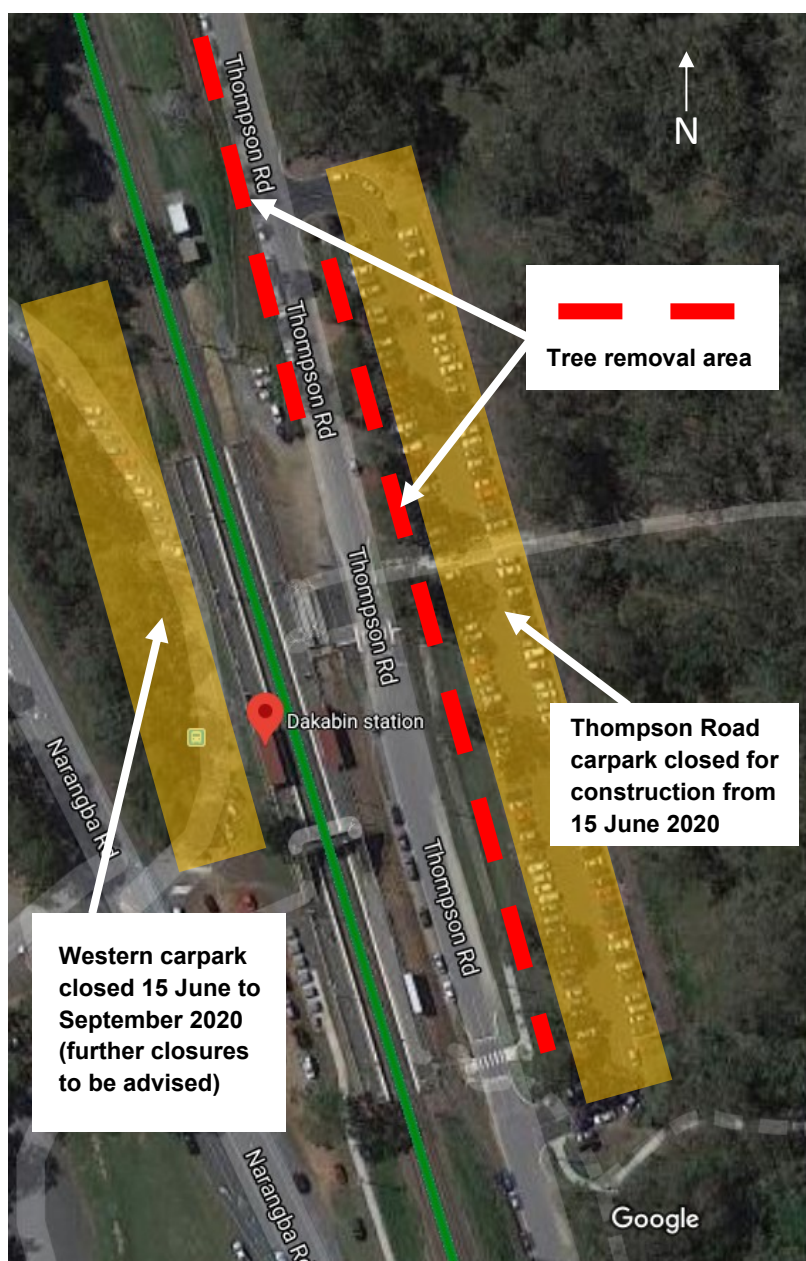

To enable the safe construction of the station's new multi-storey carpark and surrounding road network, Queensland Rail will commence removing street trees along Thompson Road, adjacent to the main carpark and near the site compound, in late June.

These works are necessary to provide access to construct the Thompson Road precinct, including the new carpark.

A qualified fauna spotter/catcher will supervise these works to ensure the protection and safe removal of any animals prior to clearing activities.

Revegetation, using appropriate species, will be undertaken in consultation with Moreton Bay Regional Council as part of project works.

Thank you for your cooperation while we build you a better Dakabin station. For more information, contact the project team on free call **1800 722 203** or email **stationsupgrade@qr.com.au**
