

## SEQ Rail Stabling Program – Woombye construction update

CPB Contractors is continuing work to construct the Woombye stabling facility. The following construction activities will be undertaken throughout July 2016, weather permitting:

### Activities include:

- Earthworks and ground preparation for the stabling facility access road and carpark
- Installing drainage, water and sewerage services
- Installing concrete foundations for overhead line equipment (OHLE) and signals
- Installing concrete foundations for lighting and CCTV poles
- Installing OHLE and signal masts
- Installing the security fence for the stabling facility
- Transporting materials such as capping and ballast using haulage trucks.

These activities will include the use of machinery such as excavators, mobile cranes, front-end loaders, generators, scrapers, dozer, grader, pad foot roller, smooth drum roller, vacuum excavation trucks, concrete truck, concrete pump and small power tools such as drills, track welders, saws and hammers.

You will notice the following around your local area and on-site during these works:

- Increased truck and vehicle movements along Old Palmwoods Road and Back Woombye Road from Monday to Saturday 6.30am to 5.00pm for deliveries of material and equipment to site
- Old Palmwoods Road, Back Woombye Road, Blackall Range Road and Reids Road will be the primary haulage routes during the project, however some light vehicles may use alternative routes dependent on the origin of the supplier
- Workers may arrive on-site between 5.30am and 6.30am to prepare for the day's activities.

The Project Team will endeavor to minimise impacts to neighboring residents and businesses including noise and dust during the construction of the Woombye stabling facility. We appreciate your patience during the construction period and will continue to update you as work progresses.

# For your information

## Rescheduled dates:

Due to the severe weather during the scheduled North Coast line closure on 4-5 June 2016, CPB Contractors was unable to complete previously planned construction activities. Residents and businesses will be notified of rescheduled dates for this work, which include the installation of the stabling facility turnout rail, once new dates have been confirmed.

## Where can I find out more information?

For any queries related to the operation of the facility, please contact Queensland Rail on **1800 783 334** (free call) or email **stabling@qr.com.au**. Visit [www.queenslandrail.com.au/stabling](http://www.queenslandrail.com.au/stabling) anytime for more information and updates.
