

# Woombye stabling facility

## Storage of NGR trains not in service

September 2018

Queensland Rail would like to update the Woombye community on the transition of its stabling facility towards its full operational state.

Since March, we have been using the facility for training and storing test trains periodically. From Monday 24 September, NGR trains will be stored at the facility on a longer-term basis, ahead of the final testing required to enter full revenue service.

This will involve trains being stabled with the power on, however they will remain in stabling mode to minimise noise.

There is not expected to be any activity during the night as the trains are not yet in service and are not required to be cleaned. The lights will continue to operate at a low level, unless triggered by movement in the facility.

The Woombye stabling facility is expected to be fully operational later this year at the earliest, when trains will be stored overnight and cleaned on a daily basis.

Queensland Rail would like to thank the community for its patience during the construction period and as we work towards commencement of full operations.

If you have any questions about the facility or would like to provide feedback, please call **13 16 17** or email [communityengagement@qr.com.au](mailto:communityengagement@qr.com.au)
