

Woombye stabling facility

Testing and training phase

July 2018

Earlier this year, the Woombye stabling facility moved into a testing and training phase which has involved the overnight storage of trains.

The facility will continue to be periodically used for training purposes, with trains stabled overnight when required. Trains may also be stabled at the facility for longer periods, as necessary.

There is no activity during the night in the yard while trains are being stabled, so lights are set to operate at a low level, until the facility becomes fully operational.

The Woombye stabling facility is expected to be fully operational later this year at the earliest, when trains will be stored overnight and cleaned on a daily basis.

Queensland Rail will advise the community in advance of the facility becoming fully operational.
