

Coomera to Helensvale Duplication

Rail corridor vegetation clearing

July 2016

Queensland Rail is duplicating the final section of single track on the Gold Coast line, between Coomera and Helensvale stations.

The Coomera to Helensvale Duplication involves duplicating 8.2 kilometres of track and eight rail bridges, installing overhead electrification and signalling systems, and replacing 3.8 kilometres of timber barrier fencing.

From Monday 11 July 2016, works will commence to remove vegetation on the western side of the rail corridor to enable construction of the duplicated rail line between Coomera and Helensvale stations.

This vegetation is required to be removed to provide sufficient space for a rail maintenance access road adjacent to the new line and to enable the installation of replacement barrier fencing. It will also assist the safe operation of new overhead electrification systems for the new line.

Following the removal of this vegetation, works will commence to construct the rail maintenance access road and install replacement barrier fencing.

Overview of work

Location	Dates and hours of work	Type of work
On the western side of the rail corridor between Saltwater Creek and Gold Coast Highway	11 July 2016 to September 2017 7am to 6pm, Monday to Saturday	<ul style="list-style-type: none">Removal of vegetation where requiredConstruction of rail maintenance access roadCommence installation of replacement barrier fencing

Residents located near this area may experience noise from the operation of construction machinery, including increased movement of light and heavy construction vehicles.

Queensland Rail apologises for any inconvenience and thanks the local community for their cooperation during these important works.
