Oakey Creek bridge replacement
Change to Kent Street and footpath reopening – Monday 7 December 2015

AMENDED WORKS NOTICE

Queensland Rail’s project to replace the timber rail bridge over Oakey Creek, approximately 150 metres west of Oakey station, is nearing completion.

The removal of the old timber bridge and installation of the new 80-metre, seven-span concrete bridge and rail track was undertaken in early October. Drainage works, park reinstatement and road resurfacing have also been carried out as part of the project.

Due to the recent wet weather, Kent Street will now reopen to traffic on Monday 7 December 2015, weather and construction conditions permitting. We apologise for this change and thank you for your patience.

The pedestrian path which runs under the rail bridge will also be opened to the public at this time.

Queensland Rail appreciates the cooperation and understanding of the Oakey community while we have undertaken these important works to replace the rail bridge.

Queensland Rail has been discussing ideas with Toowoomba Regional Council about how the original bridge could be commemorated for its role in serving the region. We will continue to work with Council to develop a firm concept for the commemorative project and will keep the local community informed of our progress.

All notices and project updates will be posted on Queensland Rail’s website at queenslandrail.com.au/oakeybridge.

For more information about this project please phone 13 16 17 (between 8am and 5pm, Monday to Friday) or email communityengagement@qr.com.au.
