

Dinmore station accessibility upgrade

Project update – May 2016

Construction has commenced on the Dinmore station accessibility upgrade. This upgrade is being undertaken as part of Queensland Rail's \$212 million station upgrade program.

Project progress

Recently, work was carried out on the platforms and within the rail corridor to enable main platform construction activities to begin.

Other works recently completed include:

- relocation of signalling equipment towards the northern end of the station
- service relocations within the station precinct
- installation of new overhead structures
- commencement of excavation work for lift shaft foundations.

Upcoming works

In the coming weeks, the following construction activities will occur:

- further lift shaft excavation works
- installation of new light pole footings
- construction of access road between River Road and platform 1
- delivery of major components for lift shaft and stair foundations
- trenching and conduit work.

Construction impacts

Customers and residents adjacent to Dinmore station may experience:

- noise associated with heavy machinery
- use of reversing beepers
- mobile lighting towers
- changed traffic and parking conditions
- increased vehicle movements around the work zone.

Residents and other stakeholders will be given advance notification of construction activities likely to cause impacts, including after-hours work (nights and Sundays, if required).

Keeping you informed
