

Rail grinding noise notice

Bethania

May 2024

As part of an ongoing maintenance program, rail grinding is scheduled to be carried out on sections of the network during January. The rail grinding machine, or grinder, is an on-track machine that removes track irregularities which improves safety and provides a smoother ride for our customers.

The grinder can only safely operate when there are no trains on the line and as such, works are undertaken at night and the machine is stowed at a nearby location during the day. **The machine will be stowed near Bethania station between 5am and 8pm, each day between Wednesday 1 and Friday 3 May.**

Preparation work, involving engine noise, will be carried out on the machine during the day and early evening. Residents near the daytime storage location may experience periods of noise during this time.

Queensland Rail will make every effort to carry out these works with respect for our valued neighbours and we apologise for any inconvenience.

Dates, times and locations are subject to change to meet operational requirements.
