

Policy statement

Technology and Telecommunications

Our Commitment

Queensland Rail is committed to ensuring its Information Technology (IT) and Telecommunications assets are reliable, fit for purpose and secure. The acquisition and use of IT and Telecommunications assets will be strategically aligned to Queensland Rail's business strategies and focused on optimizing productivity, efficiency, security and an appropriate return on investments.

What we will do

IT and Telecommunications solutions and services will:

- be appropriately governed, according to business risk, value and complexity;
- be delivered through a service-oriented model;
- be consistent with the defined IT architecture and best suited to the existing assets;
- be fit for purpose;
- be secure from unauthorised access, penetration and use; and
- be reusable where they do not present a detriment to the architectural integrity or functionality of the systems, IT solutions or services.

Nick Easy
Chief Executive Officer
